

**To:** Cybersecurity Team

**From:** Shay Zur / CISO - Israel Electric Corp.(IEC)

**Subject:** Review and Feedback Requested on design and implementation of cyber security for Operational Technology (OT) systems.

**Date:** 2026 -September 1<sup>st</sup>

Dear team Manager,

Given the increasing cyber risks facing global energy infrastructures, it is essential for industrial OT organizations to adapt to the emerging challenges.

As IEC's current and future vendor of our critical OT systems, we would appreciate receiving your comments and feedback regarding cybersecurity safeguarding measures for these systems. The relevant topics are detailed in the appendix to the RFI.

This request is intended for leading companies and manufacturers in the field of Operational Technology for the electric power sector, supporting the electricity value chain, including power generation, transmission, distribution, and supply.

With this document in mind, we also would like to propose an open discussion between our cybersecurity teams to address key points that may influence the design and development of cybersecurity packages.

We would appreciate receiving your written comments on any or all the provisions of the enclosed appendix, in preparation for our mutual discussions.

We greatly appreciate your cooperation and look forward to receiving your comments, as well as meeting with your team.

Yours sincerely,

**Shay Zur**
